All loads shown in tonnes

Grade 10 Short Link Chain

Mechanical properties in accordance with EN818-2 +25% and ASTM A973/A973M.

Chemical composition and dimensions conform to EN818-2.

The Grade 10 chain is embossed with manufacturer's mark and grade (MA10) and class leading batch code traceability.

All sizes for the William Hackett Grade 10 are proof tested at manufacture to 2.5 times the given working load limit and have a range of diameters from 6mm – 32mm. The Hackett Grade 10 chain is suitable for use in a temperature range of -40°C up to 200°C without reduction in working load limit.

Surface Finish: Blue Painted.

Hack10 Component Connector

All William Hackett Hack10 lifting components comply fully with the relevant section of EN1677, ASTM A952/A and DIN PAS 1061. The grade 10 components are forged from alloy steel, they are crack detected following heat treatment and finally proof tested to 2.5 times working load. The full compliance of these components means that they can be used in chain slings certified to EN 818-4, for use in a temperature range of -40°C up to 200°C without reduction in working load limit.

Hack10 Clevis Clutch

All William Hackett Hack10 lifting components comply fully with the relevant section of EN1677, ASTM A952/A and DIN PAS 1061. The grade 10 components are forged from alloy steel, they are crack detected following heat treatment and finally proof tested to 2.5 times working load. The full compliance of these components means that they can be used in chain slings certified to EN 818-4, for use in a temperature range of -40°C up to 200°C without reduction in working load limit.
